

Shaath: Those who rule in America have destroyed all chances for peace

Ramallah - Al- Najah News - Vice President of the Socialist International, Nabil Shaath, considered that while those who rule in the occupying state are striking the wall with all the values and meanings of peace, those who rule in America destroy all chances for peace in the region.

Shaath stressed during his participation, today, Saturday, in a hypothetical meeting of the Socialist International Organization, with the participation of the vice presidents and the Secretary-General, and representatives of socialist parties around the world, including 43 countries in which socialist parties rule, that the pressures exerted by the Trump administration enabled the occupation state to move forward. In the establishment of settlements and colonial expansion throughout the Palestinian territories.

He called on the international socialist parties in the world to pressure the governments of their countries to abide by the decisions of international legitimacy, foremost of which are recognition of Palestine on the 1967 borders and the right of our people to return to their homes and lands from which they were displaced.

Shaath recalled the decisions of the Socialist International Organization regarding the unconditional recognition of the State of Palestine, its rejection of the US "Deal of the Century" initiative, and its commitment to end the Israeli occupation of the Palestinian state completely in order to achieve the two-state solution, and a just solution to the Palestinian refugee issue in accordance with United Nations Resolution 194.

He drew attention to the practices of the Israeli occupation and the racist policies of discrimination against the Palestinian people, and its ongoing measures that deprive the Palestinian people of their inalienable right to self-determination and sovereignty, and undermine international legitimacy.

Shaath called on governments, parliaments and parties from the Socialist International to take concrete measures against the Israeli occupation, and to implement the decisions of the Socialist International in boycotting Israel and pursuing it internationally, so that they adhere to international legitimacy and the concluded agreements, and continuous work in confronting the Israeli-American project.

He reaffirmed that the alliance based on interests between Prime Minister Benjamin Netanyahu and President Trump will lead to a real disaster by destroying all peace opportunities and destabilizing the region, pointing out that the only way to peace and achieving security and stability lies in the Palestinian people obtaining their rights, foremost among which is the establishment of His independent state, with Jerusalem as its capital.

Shaath called on the American administration and the occupation government to respect international legitimacy decisions and the agreements concluded, which were to result in a Palestinian state, indicating that the pressures exerted by the two countries are destructive to the chances of achieving a just and comprehensive peace in the region.
